

# SolarBag® 3L

## ARE YOU PREPARED?

## Sunlight Powered Water Purifier

Simple, Safe, Effective

Reusable up to 500 times

No chemicals, no pumping

MEETS EPA GUIDELINES FOR WATER PURIFIERS

Treats More Contaminants!

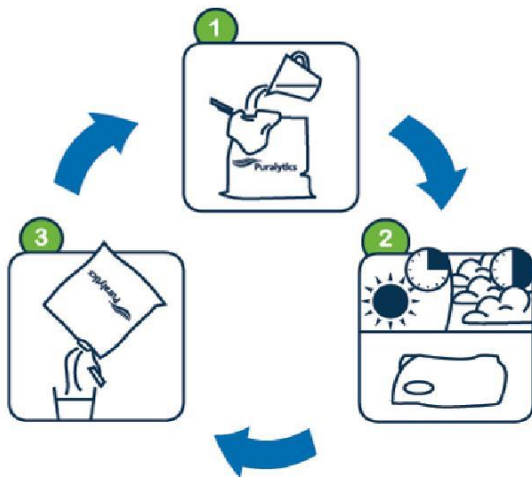

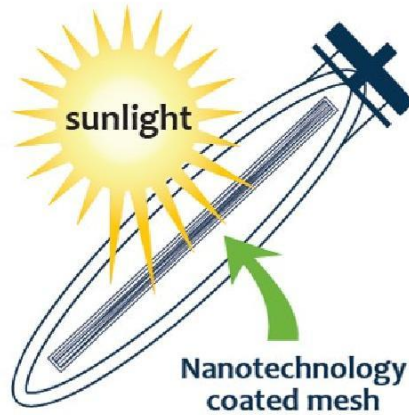

- ✓ *Bacteria*
- ✓ *Viruses*
- ✓ *Protozoa*
- ✓ *Petrochemicals*
- ✓ *Pesticides*
- ✓ *Herbicides*
- ✓ *Heavy Metals*
- ✓ *Pharmaceuticals*

In a disaster, water sources are contaminated with both toxins and germs. Tablets, filters and even boiling water cannot remove all these contaminants. The reusable **SolarBag 3L** is a purification, transport, and storage system for use with unclean water. Without using chemicals, consumables, or power, the **SolarBag 3L** is able to remove microorganisms, chemical contaminants, and heavy metals from water.

Sunlight, even on a cloudy day, activates our new, powerful purification capability.

Treats up to 2-gallons of water per day. Reusable hundreds of times.

1. Fill with water from any fresh water source, using supplied filter or cloth.
2. Expose to sunlight or open sky, 2-3 hours on a sunny day, or 4-6 hours on a cloudy day or if the source water is tea-colored.
3. Enjoy your safe, purified water! Again, and again, and again . . .
